### EXERCISE #9: Internal Style Sheet

Edit the script below with the following specification:

- Set background color of the page to green.
- Change the color of the element <h1>, <h2>, <h3>, <a>, <em>, <strong>, to yellow.
- Change the color of the element <label> to black.
- Center the element <p> and <h1>.
- Change the font size of the element <p> to 20px.
- Change the padding of the element <table>, <th>, <td> to 10px.

Save your work under "**Internal Style Sheet**" folder. Filename: **Exer5.html**

```
<!DOCTYPE html>
<html>
<head>
  <title>Internal Style Sheet</title>

  <style>

  </style>
</head>
<body>
  <h1>Internal Style Sheet</h1>

  <p>An internal CSS is used to define a style for a single HTML page.

      An internal CSS is defined in the "head" section of an HTML page, within a
  "style" element:

</html>
```

## Internal CSS

An internal CSS is used to define a style for a single HTML page.

An internal CSS is defined in the <head> section of an HTML page, within a <style> element:

Example1:

```
<!DOCTYPE html>
<html>
<head>
<style>
body {background-color: powderblue;}
h1   {color: blue;}
p    {color: red;}
</style>
</head>
<body>

<h1>This is a heading</h1>
<p>This is a paragraph.</p>

</body>
</html>
```

Example2:

```
<!DOCTYPE html>
<html>
<head>
<style>
h1 {
    color: blue;
    font-family: verdana;
    font-size: 300%;
}
p {
    color: red;
    font-family: courier;
    font-size: 160%;
}
</style>
```

Prepared by:  
Jay-Arr C. Buhain

```
</head>
<body>

<h1>This is a heading</h1>
<p>This is a paragraph.</p>

</body>
</html>
```

## CSS Border, Padding, Margin and Text Alignment

Example3:

```
p {
    border: 1px solid powderblue;
    padding: 30px;
    margin: 50px;
    text-align: center;
}
```

## ID Attribute

```
<style>
#p01 {
    color: blue;
}
</style>
<p id="p01">I am different</p>
```

## Class Attribute

```
<style>
p.error {
    color: red;
}
</style>

<p class="error">I am different</p>
```
